

## Tennessee Tech University– Lab Science Building Cookeville, Tennessee

### Services Provided:

- **Subsurface Exploration**–  
soil test borings  
geotechnical engineering
- **Construction Testing**–  
site preparation testing  
foundation observation  
field testing of concrete  
masonry & structure steel
- **Laboratory Testing**–  
concrete compressive  
strength

160,000 sq. ft. lab science facility on the campus of Tennessee Tech University in Cookeville, TN. This facility, completed in 2020 at a cost of \$90 million, is the largest academic building on campus. It houses the chemistry department, a portion of the biology department and lab space for earth sciences, physics and environmental sciences.

During construction, ETS provided engineers and engineering technicians to observe site preparation activities, subgrade and foundation excavation observations, sampling and testing of concrete to verify compliance with project plans and specifications.
